### Description

**For Sale to Law Enforcement Only!**

**NARK Fentanyl Reagent** presumptive test is designed to identify either Fentanyl or Acetyl-fentanyl which is commonly cut into Heroin or sold as a stand alone substance. Fentanyl is a fully synthetic opiate that falls under Schedule II in the Controlled Substance Act.

Like all NARK narcotic field tests, the **Fentanyl Reagent** is a **presumptive** field drug testing. 10 tests/box.

**NOTE: ALL TEST RESULTS MUST BE CONFIRMED BY AN APPROVED ANALYTICAL LABORATORY!** The results of this test are merely presumptive. NARK® only tests for the possible presence of certain chemical compounds. Reactions may occur with, and such compounds can be found in, both legal and illegal products. This test must be administered following its specific instructions and may be used in conjunction with other reagents in the NARK® II Sequential Testing System.

### Special Considerations

- Restricted to LEO
- HAZMAT Shipping Ch
